

# thrive natural disaster list

Disasters are like certainty and uncertainty; there can be major misunderstandings. Some are more familiar like hurricane, fire and or local shooting. While others more subtle, yet, impactful like a flu pandemic break out, computer hack or food safety issue. The latter are initially, microscopic in size but in the end, yield destruction that leave normal operations with limited to no capacity.

**Disaster Definition:** “A Sudden event, accident or natural disaster, that causes great damage or loss of life.” Disaster can be natural, man-made or environmental.

## Immediate Objectives

- To understand what disaster is
- Which are common in the geographical area of my church, myself and key staff members?
- What level of preparedness we would rate if a disaster were to happen this evening?  
(emergency disaster plan)
- How prepared are we to continue operations following disastrous change or catastrophic loss?

## List of Disasters
